

#### TURNTABLE

Turntable allows the main track to intersect a secondary track section. The turntable requires no power connection of its own – the V4 lift's power-sharing feature actuates the turntable.

#### EXCHANGER

Exchanger functions like a branch in the road. Allows the lift access from one care area to separate care areas. The exchanger is also a power sharing device - actuated by the V4 lift.

#### GATE

Gate for transiting from an X-Y (movable 3<sup>rd</sup> rail) system to a single track system.

#### KWIKtrak

The BHM family of ceiling lifts glide smoothly under their own power, or manually along our KWIKtrak ceiling mounted tracking. KWIKtrak's low profile design blends nicely into any rooms decor. A simple straight track design provides basic point

to point transfers. The addition of a curved track allows access to the bathroom for toilet and bathing needs. Optional turntables, exchangers and gates eliminate almost all mobility barriers and allow you to use the V4 to its fullest potential.

## AVAILABLE SLINGS

The lifting sling uses a loop system to securely connect it to the lifts carry bar. A variety of sling sizes and types are available to suit all needs.

#### HAMMOCK SLING

For most transfers. Head-rest incorporated. Suitable for most individuals. Excellent for bathing.

#### QUICK-FIT SLING

For general transfers. Perfectly suited for stocky or obese patients with strong hips or large thighs.

#### HYGIENIC SLING

Ideal for transferring to the toilet. It also permits an easy way to change, dress or undress the individual.
