

310

for outdoor staircases

Directional Controls

Mounted on either arm of the chair, the low-pressure joystick will operate the stairlift in the required direction of travel. For safety the chair will only move while the joystick is pushed.

Seat belt

A lap-belt is fitted as standard.

Manual swivel seat

Light-touch levers on either side of the seat operate the swivel seat, allowing the user to turn onto the top landing for safety and ease of use.

Folding Seat

The waterproof seat may be folded away when not in use.

Safety Edges

Five sensitive safety sensors insure that the stairlift stops immediately if anything obstructs the travel.

Footrest

The non-skid footrest may be folded away for safety when not in use.

Batteries

Two standard 12 volt batteries allow the stairlift to operate in the event of a power outage. They also give a smooth, quiet ride. Recharging is automatic and continuous to overcome the effects of cold weather.

Key Switch

If required, the keyswitch may be used to prevent unauthorized use.

Rail

The stairlift travels along a narrow rail which encloses the mechanism. The rail stands on legs which attach to the stair treads, not a wall rail. The non-skid footrest may be folded away for safety when not in use.

The Stannah 310 outdoor straight stairlift offers the perfect solution for homes with straight staircases to decks, in hilly areas, sea-side resorts or cities.

The Stannah 310 is the first outdoor seated stairlift truly designed to work in a variety of weather conditions; sunshine, rain or snow. To cope with the ever-changing weather conditions, it has been tested to insure it operates between 23°F and 105°F (-10°C to +40°C) making it suitable for a wide range of climates.

Operating the Stannah 310 couldn't be easier. Lightly touch the joystick and glide effortlessly up or down the stairs. At the top of the stairs, simply press down on one of the swivel levers to turn the seat to face the upward direction, where you can easily get on and off of the seat.

The Stannah 310's battery-powered motor gives a quiet and smooth ride, as well as a gentle start and stop, and because it charges continuously, the stairlift is ready for use even in a power outage. Every Stannah 310 stairlift comes with a protective cover to keep it clean when not in use.

The power supply for the stairlift is not exposed to the elements - all wiring is carefully protected.

The Stannah 310 should be installed into a solid base such as concrete, solid wood or steel.

The Stannah 310 outdoor stairlift. It's just the lift you need.
